

**ICA2018**  
11th International Congress on Aerobiology  
3-7 September 2018, Parma, Italy

## The Italian Network POLLnet: the database as background to detect airborne pollen trends and investigate climate change effects

Vincenzo De Gironimo 1, Fabiana Cristofolini 2, M. Francesca Borney 3, Alessandro Travaglini 4, Elena Gottardini 2, Patrizia Anelli 5, Bianca Maria Billi 6, Clara Bocchi 7, Edith Bucher 8, Francesca Cassoni 7, Simona Coli 6, Nicole Martinet 3, Annarosa Miraglia 4, Cinzia Para 5, Michele Rossi 8, Francesca Tassan-Mazzocco 9, Pierluigi Verardo 10, Stefano Marchesi 11

1-ISPRA - Istituto Superiore per la Protezione e la Ricerca Ambientale -

2 Department of Biodiversity and Molecular Ecology, Research and Innovation Centre, Fondazione Edmund Mach (FEM)

3 Regional Agency for the Environment Protection of Aosta Valley (ARPA VdA)

4 Department of Biology, University of Rome "Tor Vergata"

5 Regional Agency for Prevention, Environment and Energy of Emilia-Romagna (ARPAE)- Rimini

6- Regional Agency for Prevention, Environment and Energy of Emilia-Romagna (ARPAE)- Bologna

7 Regional Agency for Prevention, Environment and Energy of Emilia-Romagna (ARPAE)- Parma

8 Environment Protection Agency Bolzano (APPA BZ)

9 Regional Agency for the Environment Protection of Friuli Venezia Giulia (ARPA FVG), SOS Qualità dell'aria sede di Trieste

10 Regional Agency for the Environment Protection of Friuli Venezia Giulia (ARPA FVG), SOS Qualità dell'aria sede di Pordenone

11 Regional Agency for Prevention, Environment and Energy of Emilia-Romagna (ARPAE) - Modena

# Main topics

1. The importance of the network
2. START date (DOY) trends
3. Role of temperature

## The importance of the network

- 57 monitoring stations
- Hirst Type samplers
- Same protocol adopted
- One DataBase

Necessary prerequisite for data analysis

## The importance of the network

- Aosta
- San Michele a/A
- Bolzano
- Pordenone
- Trieste
- Parma
- Bologna
- Rimini
- Roma

- Alnus
- Betula
- Corylus
- Cupress.-Taxaceae
- Fraxinus
- Olea
- Castanea
- Quercus
- Graminaceae
- Urticaceae
- Ambrosia
- Artemisia

2000-2016

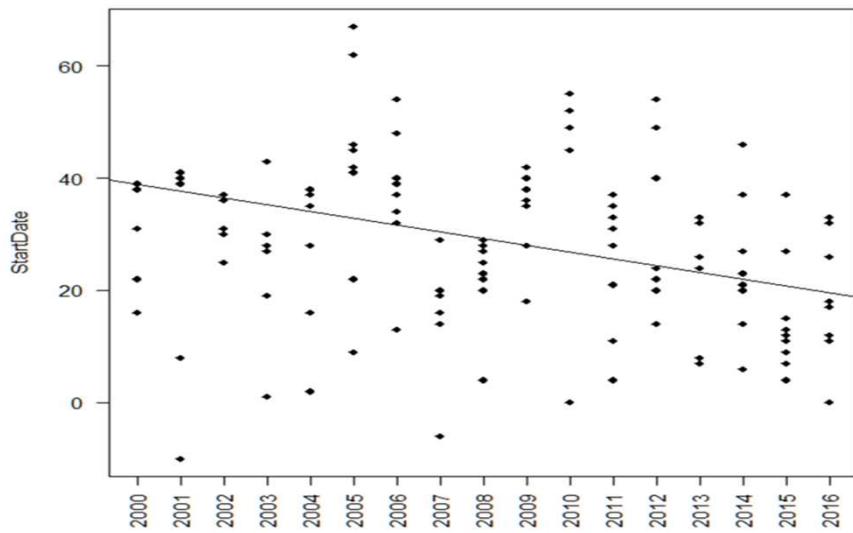

&

Meteo data  
available

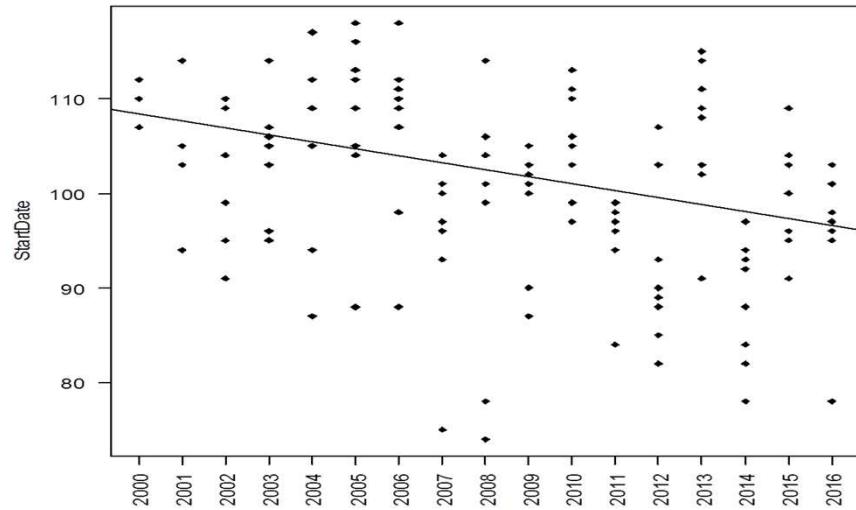

QA: only data with completeness >75%

## START date (2.5%) trends

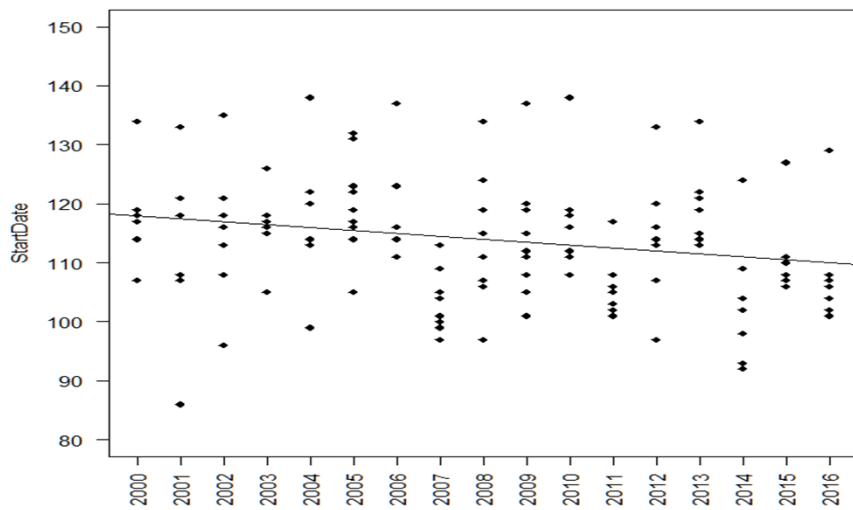

### CORYLUS

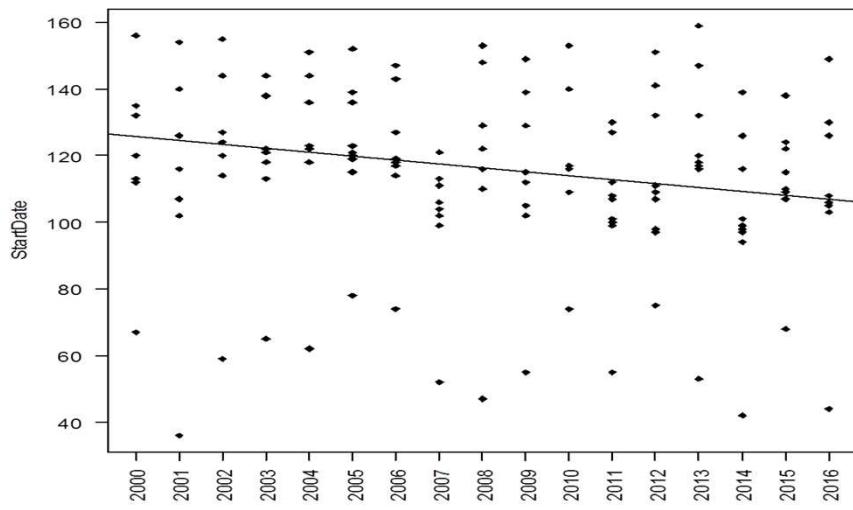

### QUERCUS

### GRAMINACEAE

### URTICACEAE

## Role of TEMPERATURE

Start date (DOY) vs Temperature min and max (mean monthly temperature)  
Non parametric Spearman correlations

	CORYLUS		QUERCUS		GRAMINACEAE		URTICACEAE	
	Percentage of stations with significative correlations		Percentage of stations with significative correlations		Percentage of stations with significative correlations		Percentage of stations with significative correlations	
	T min	Tmax	T min	Tmax	T min	Tmax	T min	Tmax
October								
November								
December		56%	—					
January	67%	—	78%	—		56% —		
February						78% —	56% —	63% —
March					89% —	67% —	67% —	63% — 50% —
April						67%		63%

Month of flowering
